The instructor was well prepared for the class.

 Copy

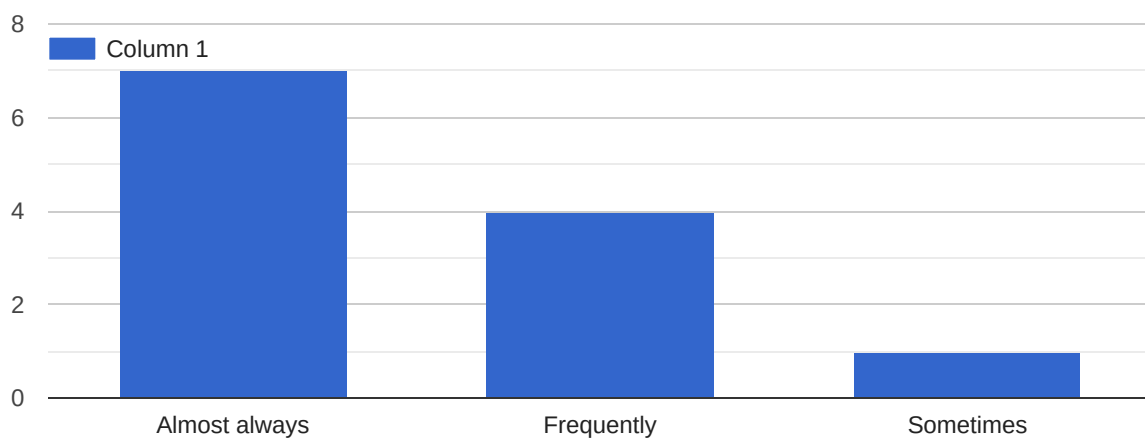

The instructor showed an interest in helping students learn.

 Copy

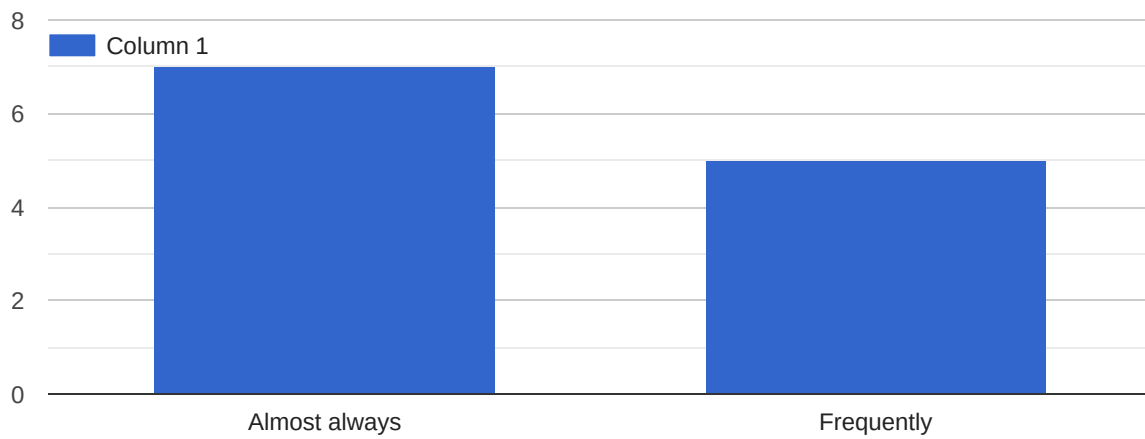

The lectures, tests, and assignments complemented each other.

 Copy

The instructional materials (i.e., readings, handouts, study guides, lab manuals, multimedia, software) increased my knowledge and skills in the subject matter.

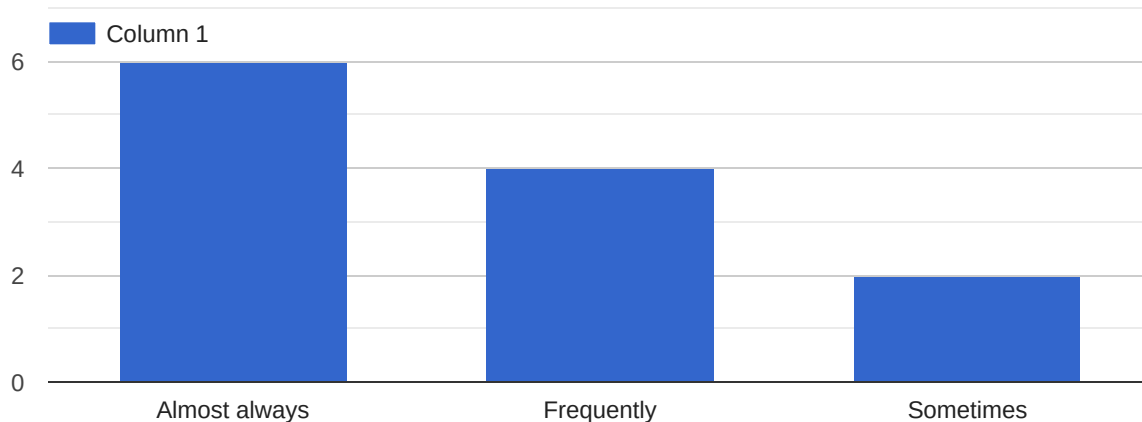

The course was organized in a manner that helped me understand the underlying concepts.

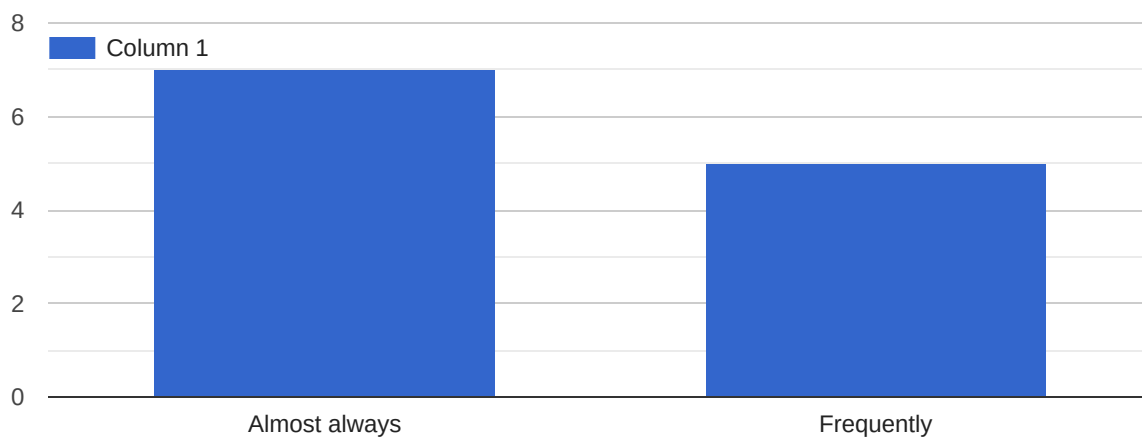

The course gave me the confidence to do more advanced work in the subject

 Copy

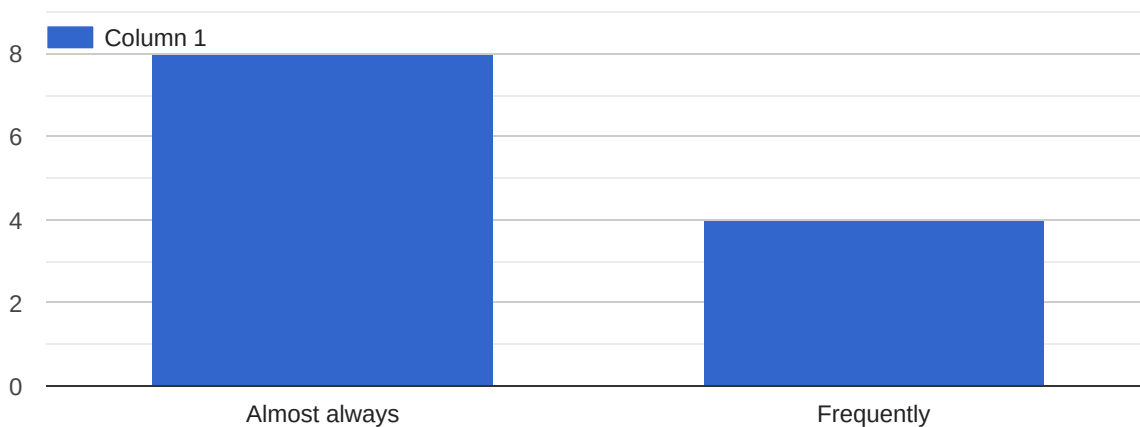

I believe that what I'm being asked to learn in this course is important

 Copy

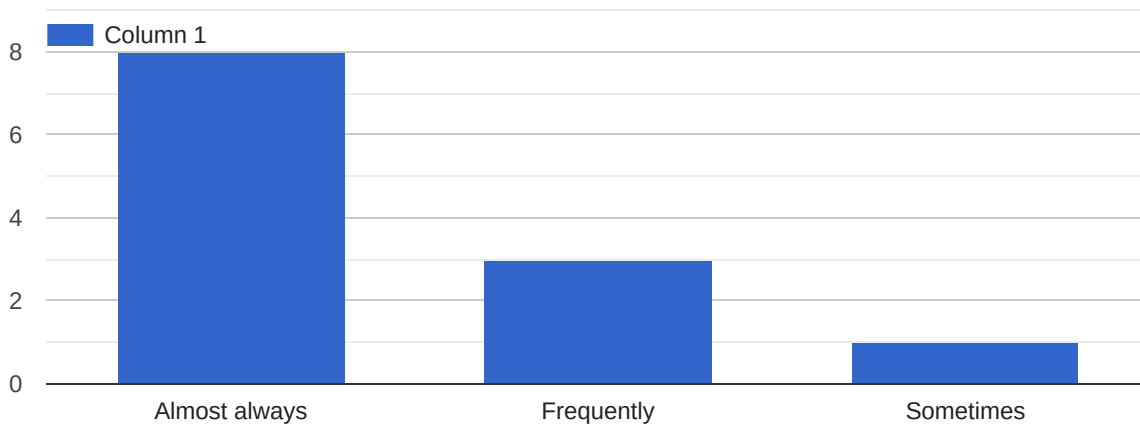

I would highly recommend this course to other students

 Copy

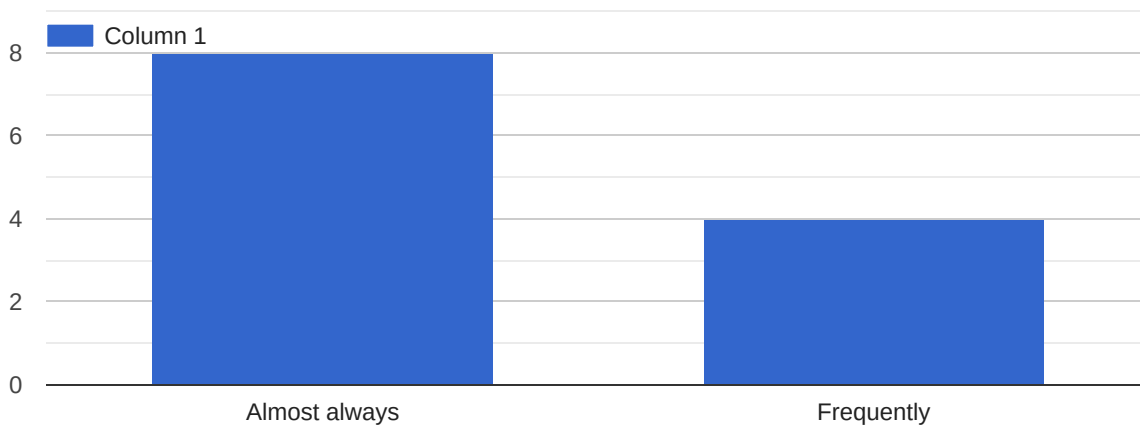

Overall, this course met my expectations for the quality of the course

 Copy

The course was helpful in progress toward my degree

 Copy

How satisfied were you with your experience with the software Mathematica?

Please comment on the section leader's knowledge and presentation of the material and how well he/she coordinated the sections with lectures.

6 responses

he is ability to manage teaching materials has been satisfactory to say the least

Excellent

Everything was well coordinated and presented in a way that made it easy for us to understand.

He was very good in both of them

His knowledge was of a very high standard and he tried to pass this knowledge on to us in the simplest possible way.

The lectures were well prepared and presented. The teacher's knowledge and willingness gave us a sufficient understanding of the material. The lectures were presented in a way which helped us gradually learn the difficult concepts and ideas.

Please comment on the section leader's effectiveness as a discussion leader, his/her ability to answer questions and keep the discussion on track.

7 responses

discussion was integral part of our class with the leader always promoting conversational environment

Πάντα προσπαθούσε να βοηθήσει

Excellent

All the questions we had were well and in detail explained by the leader.

His answers were always helpful and explanatory

he always tried to say difficult concepts more simply so that it is more understandable to us.

The leader's ability to answer questions was more than sufficient. He managed to answer the questions that we had giving more information and advices when was needed.

Please comment on the attitude of the section leader towards the students and his/her availability outside of class.

6 responses

he has been very communicative with the students and was always available through email for any questions that may arise

Excellent

The leader was quite approachable during the semester especially through Slack but was also very responsive via email as well.

He was really nice and helpful

He was very responsive either by email or through Slack application which was done on his own initiative.

Overall the teacher's attitude was friendly and cooperative. Given the circumstances, his availability outside of class was adequate.

Please comment on the overall performance of the section leader.

6 responses

his ability to transfer knowledge is impeccable , very good teacher and is a model teacher

Excellent

The overall performance was very professional but also helpful for the students.

Pretty helpful and he really liked to work with us

Very good teacher and I wish the rest of the teachers were like him.

The overall performance was productive and consistent.

Suggestions for Improvement

4 responses

.

One thing I would highly suggest for this course in general (not just for the lab) would be the use of "e-class" as the main source of communication and especially announcements as it's the one that is mostly used in the whole department and everyone had access to it.

As someone who didn't attend the first classes in person and without any formal announcement on eclass for the procedures, I found it quite difficult at the beginning to understand what's going on, that the attendance of lab is needed, which days the lab takes place, the need of Mathematica etc and I found all this out from mouth to mouth communication, by asking random people if they know anything and finally got in the slack team.

Nothing.

In my opinion, students would be benefited with more material and practice during lesson.
